RE: Albion-Sheridan Township Landfill Site
Albion, Michigan

Dear Gene,

Last week you received three copies of the draft Phase I Summary Report for the Albion-Sheridan site. This is intended to be a working document which will enable us to discuss the site with a common base of information and to make decisions as to how to proceed. However, since this document will, in large part, become the Remedial Investigation Report for the site, I would like any comments you might have on this document as well. Please submit any written comments to me by July 9. These would then be considered and incorporated into the RI Report.

As we discussed last week, I have planned a meeting for June 30, 9:00 a.m., at WW Engineering & Science's office. At this meeting we should be prepared to discuss the results of the Phase I investigation and to plan the next steps for the project. Specifically, I would like to talk about what the Phase I results tell us about the site; whether we have adequate information to proceed with the risk assessment, feasibility study and remedy selection; and, if we don't feel we have sufficient data, what our objectives and proposed sampling would be for the next phase. I would also like to resurrect the issue of what to do with the underground storage tanks on-site, as well as discuss a plan for disseminating site status information and data to the public.

I look forward to seeing you next week. In the meantime, if you have any questions, please do not hesitate to call me. Thank you.

Sincerely,

Mary Beth Novy

Mary Beth Novy
Remedial Project Manager
